DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 10, 2004 has been entered.

Claim Rejections - 35 USC § 112

Claims 28-30, 48-52 and 55-62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 28 and 55 the recitations are confusing. Each time Formula II is recited for R₂ it should refer to the definition as recited above instead of reciting it or not reciting it, since this is confusing.

The phrase "administering to a patient" should be amended to recite "the" or "said" patient to make it clear that the patient is the same one in need of the recited method.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1614

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28-30, 48-52 and 55-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burzynski et al as disclosed in the specification on page 5, third complete paragraph in view of Waldbillig (C13).

Burzynski teaches using the instant compounds to treat cancer. Burzynski does not teach the instant concentration. However, Waldbillig (page 3, 9-11, among others) discloses pulsing the instant compounds using the instant concentrations.

The claims differ over the references in reciting a ratio of the compounds, specific dosages, rates of infusion and combined concentration of compounds. However, in the absence of a showing of unexpected results no unobviousness is seen said limitations, since once the usefulness of a composition is taught it is within the skill of the artisan to determine said limitations.

The Declaration of Dr. Burzynski has been considered but is not persuasive in view of the teaching of Waldbillig.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1614

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 28-30, 48-52 and 55-62 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-11 of U.S. Patent No. 6,258,849. Although the conflicting claims are not identical, they are not patentably distinct from each other because '849 discloses the method of using the compounds of Formulas I and II and its "comprising" language of would allow for the addition of the compound of formula IV.
